

Profile Summary

Full-stack software engineer with 5+ years of experience building secure, scalable web and fintech applications. Strong expertise in Java, Java Spring Boot, API integration, and high-concurrency payment systems. Proven ability to deliver production-ready solutions across banking, telecom, e-commerce, and digital platforms.

Work Experience

Software Engineer

(May 2023– Till Now)

Dutch-Bangla Bank PLC. | NexusPay App

Key Responsibilities:

- Full-Stack Feature Development: Engineered secure banking services using Java Spring Boot for robust backend logic.
- Payment Gateway Engineering: Developed and optimized the DBBL Gateway to support high- concurrency multi-host transactions, ensuring data integrity and system reliability.
- System Integration & API Design: Built and maintained complex REST/SOAP Web Services and integrated third-party APIs to expand the NexusPay ecosystem.
- Database Performance: Authored and optimized complex Oracle PL/SQL scripts and stored procedures to handle large-scale financial data and transaction logging.
- Deployment & CI/CD: Managed application deployment cycles, ensuring smooth transitions from staging to production environments.
- FinTech R&D: Conducted deep-dive market analysis of global FinTech trends to drive feature innovation and improve App's competitive position in the local market.

Full Stack Web Developer

(May 2021 - May 2023)

Preneur Lab LTD

Key Responsibilities:

Enterprise Chatbot & Automation Systems

- Telecom Solutions (Robi, Airtel, Banglalink, LICT): Developed and maintained high-traffic omnichannel chatbot ecosystems across Messenger, WhatsApp, Instagram, Web, and Email.
- AI Integration: Engineered custom chatbot solutions leveraging the ChatGPT API and NLP to automate customer service workflows and office management (Ofc.ai).

E-Commerce & Digital Transformation

- Frequency Telecom (UK): Built and managed a global e-commerce platform, leading the complex integration between WooCommerce and Oracle NetSuite ERP for synchronized inventory and financial reporting.
- GreenAcres Group & Eternal Gardens (UK): Developed and maintained web platforms for leading UK service providers, focusing on high-performance UI and sensitive user experience (UX) design.
- BRAC EPL: Spearheaded the website revamp for a leading stock brokerage, ensuring a modern, secure, and responsive interface.

High-Impact Campaigns & EdTech

- Toffee World Cup '22 (AR Integration): Developed innovative Augmented Reality (AR) poster commercials and the "Flagwar" interactive game for the Toffee app, reaching millions of users during the FIFA World Cup.
- EdTech Platforms (YouthEd & YO Mentorship): Architected online education and mentorship portals for Youth Hub Bangladesh and Youth Opportunities, focusing on scalable user management and content delivery.
- Interactive Web Apps: Developed real-time engagement platforms including Khelowar.com (live games/quizzes) and the World Cup Predictor microsite.

Web Developer Trainee/ Front End

(Mar 2021 - May 2021) Remote

Key Responsibilities:

- Hands-on experience on Converting Figma to responsive webpage (HTML, CSS, JS)

Web Developer Trainee/ Back End

(Sep 2020 - Feb 2021) Remote

Key Responsibilities:

- Hands-on experience on PHP / Laravel

Academic Qualification

United International University (2021)

B. Sc. Engineering (CSE) CGPA (3.56/4)

New Govt. Degree College, Rajshahi (2016)

Hsc GPA (5/5)

Rajshahi Collegiate School (2014)

SSC GPA (5/5)

Technical skill overview

Core Stack & Frameworks

Frontend: React (Hooks, Context API, State Management), Vue.js, JavaScript (ES6+), HTML5 (Semantic & SEO-focused), CSS3 (Tailwind, Bootstrap, Materialize), [AR.js](#).

Backend: Java(core), Java Spring Boot, .NET (C# / Core), PHP (Laravel, OOP), Python

(Django, Flask), Node.js. Web Architecture: RESTful & SOAP APIs, Restlets, Oracle

Netsuite, WordPress & WooCommerce. Software Engineering & DevOps Deployment &

CI/CD: Automated Pipelines, Docker, CI/CD Principles, GitHub Actions, cPanel, Filezilla.

Methodologies: Agile/Kanban, SOLID Principles, Test-Driven Development (TDD), Clean Code. Optimization: Web Performance (Lazy Loading, Code Splitting), SEO Best Practices, Bundle Optimization. Data & Infrastructure

Databases: PostgreSQL, MySQL, PL/SQL, MongoDB, MariaDB, SQLite.

Tools & Platforms: Jira, Asana, Git (GitHub), Oracle Weblogic, Toad for Oracle, ChatGPT/Gemini/Claud/Google Antigravity (Prompt Engineering).

Operating Systems: Windows, Linux-based OS (Ubuntu).

Machine Learning & Research

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Matplotlib.

Simulation & Robotics: Gym, Gazebo, ROS, OpenAI tools.

Development Environment & Utilities

Languages: C#, Java, Python, C/C++, PHP

IDEs: VS Code, PyCharm, Eclipse, CodeBlocks, PhpStorm, Google Colaboratory. Other: LaTeX, Logisim, Proteus, MS Office, Canva (Basic Graphics & Video).

Academic Projects

- Database and Management System: Tune In This is a website project which provides a platform to buy ,sell and rent musical instruments.
- System Analysis and Design: Balloons and Ribbons This is an online event and vendor management system.
- Computer Network: IOT Weather Reporting System This project uses temperature, humidity to monitor weather and provide live reporting of the weather statistics. The system constantly monitors temperature using temperature sensor, humidity using humidity sensor. The system constantly transmits this data to the microcontroller, which now processes this data and keeps on transmitting it to the online web server over a wifi connection.
- Digital Logic Design: Line Follower Robot This robot is an automated guided vehicle, which follows a visual line embedded on the floor or ceiling. Usually, the visual line is the path in which the line follower robot goes and it will be a black line on a white surface but the other way.
- Electronics: Smart Stick For The Blind People This is a hardware project. I used an Arduino in it. If there is any obstacle in front of the stick then it will notify the person by a buzzer. And if the blind person is lost then he or she can press a button of the stick and the location of him will go to the person via sms who takes care of him. For that, I used a Mobile sim card and GPS integrated with the Arduino

Paper & Capstone

- Paper: A Review on Moving Target Defenses and Cyber Deception Technology with Software Defined Network in Cloud Computing
- Capstone (Final Year Design Project): Using Reinforcement learning to train a line follower robot.

Achievements

- Inter School Science Fair 2013 : 2nd Place Project Name: Smart Water Supply
- Mega Hunt 2019 : 2nd Place, Recitation, UIU Cultural Club
- General Scholarship JSC 2012, Rajshahi Board
- UIU Competitive Programming / member, CP batch 7

Personal Details

Father Name : Md. Hasib Ahsan
Mother Name : Anjuman Ahsan
Date of Birth : 11/09/1999
NID number: 6004986120
Marital status : Unmarried

Gender : Male
Blood Group : B Positive
Religion : Islam
Nationality : Bangladeshi

Address : 823/2, Moddho Monipur, Mirpur-2, Dhaka, Bangladesh .
